

We are looking for our location in Mönchengladbach from Q4 2020:

## Sales Engineer North (m/f/d)

measX is a renowned provider of measurement and test systems, data management applications and software systems for the evaluation of test data. Our solutions can be found in research, development and production in numerous industries.

As Sales Engineer North you are the first contact for our customers in the postal code range 0 to 6 in Germany and neighbouring countries. Sales activities such as customer visits, first technical feasibility checks, preparation of detailed offers and demonstration of our products and solutions form the basis of your success. Internally, you are valued as a competent sparring partner in technical as well as commercial discussions. Your friendly and determined appearance makes you a reliable partner in every situation.

### Your tasks:

- New customer acquisition and existing customer care
- Coordination of the activities at the customer's site
- Sales responsibility in the sales area
- Reporting to the sales management

### Your profile:

- Interest in measurement technology, data management and analysis
- Sales professional for consulting-intensive overall solutions
- Study or training in the field of electrical engineering, computer science, mechanical engineering or related fields and relevant practical experience
- A high degree of commitment, flexibility and initiative
- Ability to work independently
- German and English (spoken & written)
- Readiness to travel (approx. 50% of working time)

### We offer:

- Friendly, open and familiar atmosphere based on appreciation, helpfulness and tolerance
- Technically demanding and innovative projects of a wide range

We have aroused your interest? Would you like further information or to apply directly?  
We look forward to receiving your application by mail or e-mail. [bewerbung@measx.com](mailto:bewerbung@measx.com)
